## Textures, Rust and Patina 4 Day Intensive Workshop in Acrylics and Mixed Media

Too expensive to try every medium—join this workshop!

Textures can add a whole new dimension to your art work. During this 4 day intensive workshop we will explore numerous methods of creating textures, rust and patina using acrylic paints and a range of different mediums.

Participants will have the opportunity to experiment with a large range of materials and create a number of small artworks under Linda's step by step tuition.

- Learn how to create genuine rust and copper effects that vary in both colour and texture.
- Learn how to combine textures with multiple transparent glazes of paint to add depth to an artwork.
- Learn how to create realistic, organic looking effects using a variety of mediums.

Then use these skills to interpret a picture or landscape of your own choosing under the Linda's expert guidance.

Part of this workshop is about discovering when to "let the medium do the work" and when some gentle persuasion is required. Most importantly it is just about having fun and seeing where the journey takes you. It may be abstraction or realism...it is up to you.

Step by step demonstrations  
and tuition throughout

Written notes provided

**G S WORKSHOPS** + Material Fee \$30
